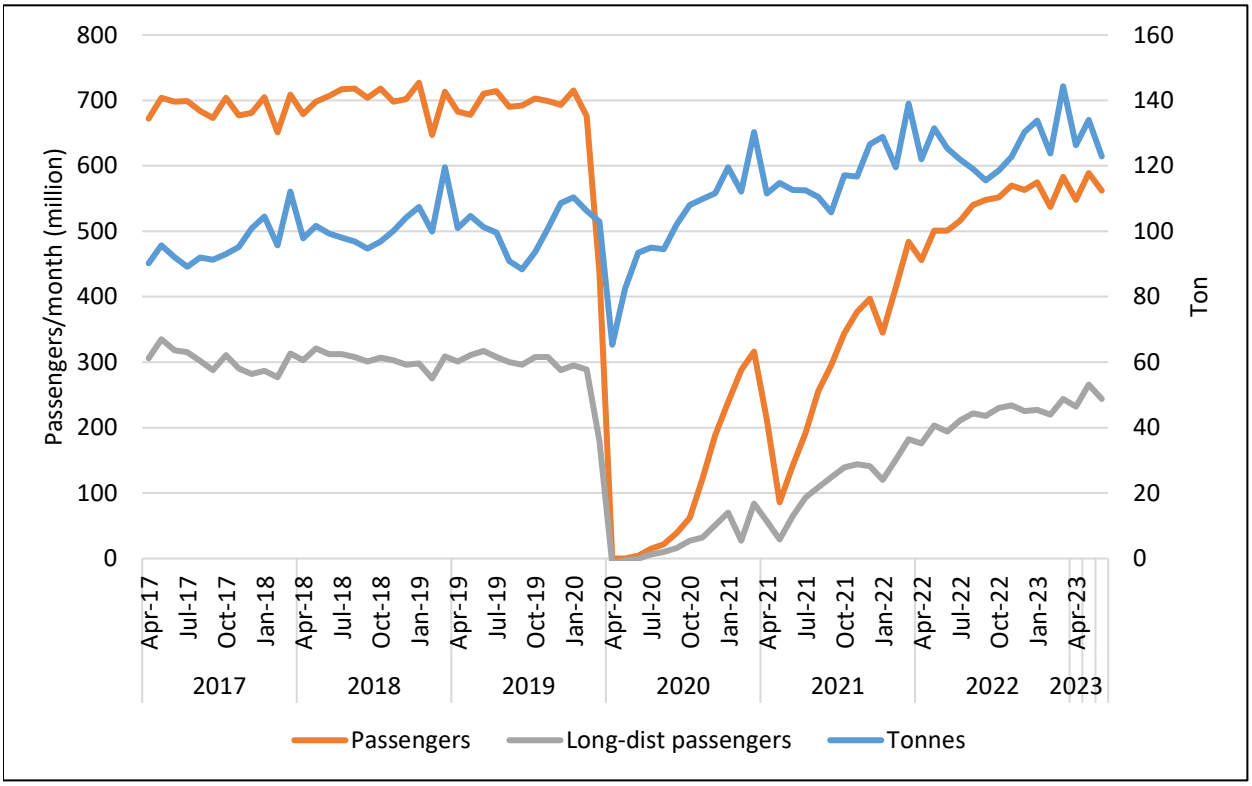

Figure 1: IR monthly traffic 2017-18 – 2023-24

9. Tables 3 and 4 give the principal commodities carried by section and direction in 2018-19.

Table 3: Corridor tonnage by commodity (west bound) 2018-19 (000 tons)

	M-A	A-K	K-T	T-K	K-D	K-S	S-I
Cement	581	552	495	200	0	1207	1207
Coal	45133	46551	39341	25113	9773	16497	16497
Containers	711	1402	1402	1023	365	3261	3249
Fertilizer	0	221	522	727	96	2845	3487
Iron and steel	5242	8476	8476	6907	4789	2373	2373
Petroleum	840	759	753	746	715	798	798
Other	733	482	567	375	84	1209	1246
Total	53241	58444	51556	35090	15823	28189	28856

10. The principal westbound traffic on all sections is coal, being 85% of the tons carried between DDU and Allahabad, reducing until in the Punjab it only represents 57% of the traffic. This is largely coal for power stations, either publicly owned or belonging to private generators. A small amount (about 3%) is for other users, such as fertilizer plants. Iron and steel make up most of the difference, other than containers and fertilizer moving into the Punjab. Foodgrains dominate the eastbound flows, being over 75% of the traffic as far as Khurja and remaining at over 50% throughout the remainder of the corridor.
